

## Human Frequencies

Maenne is a multisensory treatment system, conceived by MD Marco Battistoni and consisting of a complex of elements, designed and created for the same. Its working principles are inspired by the most ancient medical arts in the world, Ayurveda and traditional Chinese acupuncture, to restore the energetic balance of meridians and acupuncture vessels, chakras, functional systems of our organism and, finally, of the organs themselves.

During the treatment you find yourself suspended in a universe of sound, tactile and light vibrations which, thanks to their synergistic and concordant activity, stimulate the various sensory channels of our body: auditory, visual and body tactile. The result is an unparalleled relaxation and a state of general well-being of the organism, thanks to the Maenne sound frequencies. The multisensory experience is completed and made unique by the olfactory stimulation, given by the fragrances selected for Maenne.

## The Maenne Treatment

---

Maenne system involves all our senses to restore the complete cellular harmonic synchrony and reach a total relaxation and psycho-physical well-being. This can be reached thanks to synergistic signals, concordant and coherent with each other for physical characteristics and functional applications. The Maenne special cushions are made with innovative materials and methods in order to best transmit the vibrational sound stimuli along the entire structure of the chaise longue; lying on them, you can access a complete sensory experience by choosing the most suitable cycle for your needs among the over 110 available. Maenne adds to this the synchronous and coherent luminous frequencies of the ceiling lamp, the bodily tactile ones and the functionally coherent ones of the aromatic medicinal herbs, which come in dried form, but also as ointments, elixirs and essential oils, for the sense of smell and the preparation of herbal teas and infusions to complete the stimulation of the five senses with taste.

## The available cycles

---

The Maenne library is divided, according to the possibility of use, into: harmonization cycles, simple cycles, support cycles, balancing cycles, global cycles, acupuncture meridians, organs, biological systems, chakra cycles, psyche and binaural sounds. The use of Maenne cycles contribute significantly to the quality of life and the deep relaxation that it induces, improves the well-being and effectiveness of any ongoing treatments.
